

生命河基金會技術服務組 技術培訓

Oracle SQL Fundamental

Time

Every Thursday Night
7:30pm to 10 pm
3/31 ~ 5/5
(6 meets or 15 hours)

Place

Room G10 in ROLCC
1177 Laurelwood Road
Santa Clara, CA 95054

Registration Fee

\$45

Course Description

Participants learn the concepts of relational databases and the powerful SQL programming language. This course provides the essential SQL skills to write queries against single and multiple tables, manipulate data in tables. Participants will also learn about manipulating large data sets and storing and retrieving dates according to different time zones.

Learn to

- Use SQL Statements to retrieve data from tables
- Employ SQL functions to generate and retrieve customized data
- Run data manipulation statements (DML) to update data
- Use grouping operations to create reports
- Use Regular Expression support
- Manipulating large Datasets
- Generating Reports by Grouping Related Data
- Managing Data in Different Time zones
- Retrieving data using Sub-queries
- Hierarchical data retrieval
- Performing Regular Expression Support

About the Instructor

● John Min (Senior Oracle DBA)

Solid Oracle database and RAC knowledge with over 10 years of working experience. Excellent database architecture knowledge with 8 years of hands on project experience. Great consulting experience in database design, database and application performance tuning and system integrations. Rich industrial domain knowledge includes financial industry, logistic, software house, manufacture, government, telecommunication, etc.
